MAHLE China Wins ESG Performance Award

- MAHLE China is the only recipient of the “More Than A Market Awards 2023” – ESG Performance Award in the Large Enterprise Group Category
- Award in recognition of MAHLE China’s achievements in environmental protection, social responsibilities, and corporate governance
- Lydia Shen, general manager MAHLE China: “It proves that we’re on the right path towards a sustainable future while pursuing long-term business success.”

MAHLE Holding (China) Co., Ltd. – MAHLE’s regional headquarters in China, is the only winner of the ESG Performance award of the “More Than A Market Awards 2023” in the Large Enterprise Group Category. With this award, MAHLE stands out from a score of competitive rivals across all industries with its extraordinary performance in Environmental, Social, and Governance (ESG) activities, The award recognizes not only the company’s commitment in environmental protection, social responsibilities, and corporate governance, but also its high standard of overall operation and forward-looking strategies. "It’s a great honor to receive the prestigious award," said Lydia Shen, the MAHLE China General Manager, “It proves that we’re on the right path towards a sustainable future while pursuing long-term business success."

As a foundation-owned company, MAHLE always keeps an eye on its impact on the environment and people. Ecological and social responsibility form the guiding principle that connects all business activities. Its sustainability strategy has been expanded and includes eight strategic areas that are based on the strategic pillar of End-to-End sustainability. Moreover, end-to-end sustainability is one of the seven Strategic Enablers of the corporate strategy MAHLE 2030+. This enabler will make sustainability an integral part of every business process and decision at MAHLE. Sustainability has become a core expectation from many stakeholders – customers, employees, investors – and a responsibility towards society overall.

“MAHLE China is following the group’s steps in all action fields and is making great progress particularly in the reduction of emissions, occupational health and safety, supply chain management, and innovation sustainability, among others,” said Jack Huang, head of HSE, Asia-Pacific region.

The technology group reports on the progress it is making in its sustainability strategy in its Sustainability Report 2022. It complies with the standards of the Global Reporting Initiative (GRI) and is available on the MAHLE website under Publications.

The More Than A Market initiative was launched in 2015 as a joint initiative by the German Chamber of Commerce in China and the Missions of the Federal Republic of Germany in the People's Republic of China. Its aim was to showcase the best corporate social responsibility (CSR) initiatives by German enterprises in China and their added value for the Chinese society. In 2023, the More Than A Market Awards return (after its absence in 2022 due to COVID-19) to celebrate the progress and achievements of German companies in China with an expanded focus, namely in the field of environmental, social, and corporate governance (ESG). The Awards aim to not only provide a platform for enterprises, but also help them better understand ESG, where they stand, and what more they can do to promote and implement ESG actions.

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry with customers in both passenger car and commercial vehicle sectors. Founded in 1920, the technology group is working on the climate-neutral mobility of tomorrow, with a focus on the strategic areas of electrification and thermal management as well as further technology fields to reduce CO₂ emissions, such as fuel cells or highly efficient combustion engines that also run on hydrogen or synthetic fuels. Today, one in every two vehicles globally is equipped with MAHLE components.

MAHLE generated sales of more than EUR 12 billion in 2022. The company is represented with approx. 72,000 employees at 152 production locations and 12 major research and development centres in more than 30 countries (as of 31.12.2022)
